SCGM proposes 1-for-3 share bonus issues

KUALA LUMPUR (April 28): Thermos-vacuum form plastic packaging manufacturer SCGM Bhd has proposed a bonus issue of 48.4 million new shares on the basis of one bonus share for every three existing shares, to reward shareholders.

In a filing with Bursa Malaysia today, SCGM also proposed a bonus issue of 19.36 million warrants on the basis of two free warrants for every 15 existing share.

The illustrative exercise price for the three-year tenure warrant is RM4.05, which represents a premium of about 29.39% to the theoretical ex-bonus price of RM3.13 per share, based on the five days-weighted average market price of SCGM shares up to and including April 27 this year.

Full exercise of these warrants are estimated to be capable to raise some RM78.4 million, which would be utilised as additional working capital for SCGM's daily operation.

SCGM's current share base is 145.2 million shares, and will enlarge to 193.60 million shares, subsequent to the bonus issue of new shares.

The group's share base would expand up to 212.96 million shares, assuming full exercise of all warrants.

These two corporate exercises require shareholders' approval, and is expected to be completed within two months.

SCGM's share price fell four sen or 0.98% to close at RM4.05 today, giving it a market capitalisation of RM588.06 million. Year-to-date, the counter has risen 20.5%.
